## Hackneyed crossword answer

Sometimes there are no correct answers. There are only right-for-you answers. Or right-for-your-family answers. Or right-for-right-now answers. There are a lot of decisions to make these days. Not so different from normal, except even the most basic - decisions we've never really had to think about before - seem impossibly difficult. Send your kids to school or homeschool? Go to church or stay at home? Attending an important family gathering or social distance? And that's just to name a few. Such decisions have never really been a problem. Going to church, or going to school, or maybe a wedding are always a given. Until now. And people certainly don't seem to be shy about shouting from the rooftops - or their laptops - how they think we should all answer these questions. But the truth is, there are no correct answers to these questions or the infinite others that seem impossible to answer. Sometimes none of the options are good options. Sometimes opinions are loud and we question our own judgment. Sometimes our thoughts are a swirl of confusion as we try to determine the correct answer to a question that is not one. It's good to just be quiet. Quiet. To tune the sound. To breathe and rest your brain. You don't have to worry about the right-for-everyone answer, you just have to determine the right answer. It's true that some people may be disappointed by the decision you make - after all, no matter what you decide to do, you'll never satisfy everyone. But if you know you're doing the right thing based on your own circumstances -- if your answer to those questions has caused a God-given peace in the midst of difficult circumstances -- you don't have to feel guilty. You don't have to explain. You don't have to feel bad. You're ahead of faith knowing that you've made the best right-for-you or right-for-your-family decision that you could -- maybe it won't be perfect, but you're human and perfection doesn't exist. It's good to accept that and choose differently than what's good for her, or them, or those people there. We're all different. Our circumstances are all different. Our needs are all different. You don't expect there to be a right-for-all answer. But maybe we can agree that some decisions are hard for everyone to make. Photo: Pixabay (Pexels)For some reason many people believe that the ability to solve crossword puzzles is a talent that is picked out at birth to a select few. This couldn't be further from the truth. Crossword puzzles are not an immutable test of your vocabulary or intelligence, they are an instructive skill that anyone can develop. Learning new skills one of the best ways to make yourself both marketable and happy, but... Read more No other word game or puzzle demands as much from your brain as a crossword. Experienced puzzlers consider not only the literal meaning of each clue, but also similar ones that they have seen before, often repeated answers, syntax oddities, puns, cultural references-and, references-and, of course, the theme of the puzzle. Unfortunately, this means that crossword puzzles can be downright unwelcoming to newcomers. Everyone starts somewhere, and no matter what your options look like now, here are four general strategies to help you improve. Do puzzles every dayThe only way to improve on crosswords is to do many of them, and the best way to do that is to make them work in your daily routine. For me, that means tackling a few puzzles from an old book of 365 Will Shortz crosswords before bed every night. My mother prints Washington Post crosswords and chips away from them over breakfast; my friends who commute by bus or train are diehard New York Times crossword app fans. New York Times puzzles are most people's crossword gateway drug for a reason: they are easy to find and have a built-in difficulty sort. Mondays are the easiest, Saturdays are the hardest, and the puzzles between ramp up from day to day, so you choose and choose the ones that work for you. That said, the New York Times is far from the only publisher out there. The Washington Post, Los Angeles Times and Merriam-Webster also publish American-style crosswords daily. If cryptic crosswords are your jam, try The Guardian. Some organizations, such as Queer Crosswords and Puzzles for Progress, even send you original themap puzzles as a reward for non-profit donations. Remember that each publication has its own style-mastering the tricky clue phrasing in a Saturday New York Times puzzle won't necessarily translate to any of the Post, and vice versa. Use an AppIf you really want to put your crossword game up, subscribe to an app, like this one from the New York Times, is a great idea. As much as I love them, paper puzzles just can't touch the user-friendly features you get with an app. You can easily check your work or reveal replies by letter, rather than accidentally peeking at the whole solution. This demystifies clues just enough to make them feasible, which is exactly what you want. Also, most apps time your work, making your progress easy to measure. But really, the biggest advantage is accessibility: carrying thousands of digital puzzles in your pocket makes it easy to do many puzzles. Knowing When-and-How-to CheatCheating is a sensitive topic among crossbeachers, but there's no denying that it has its place. Crosswords should be fun, and repeatedly banging my head against the same wall, praying for a different result, is not my idea of fun. Besides, frustration is a lousy teacher; Unless you have serious competing puzzle aspirations, stubbornly refuse to seek answers or check your work you get nowhere. Many require a great investment- at least, if you want to have the best gear, the ... Read moreA other way you need to solve any clue that you may have without help, but you won't improve without a challenge. A little strategic trickery can lead you through even the most difficult puzzles. Apps make this super simple: just check or reveal reveal one by one until you solve a particularly annoying clue. This gives you just enough information to (usually) hack it on your own, which in turn makes the answer more likely to hold in your memory. Paper puzzles make strategic trickery a little more difficult, but thanks to the internet, not by much. If you're stuck on a print crossword, Google the whole clue in quotes. Framing your search around the clue instead of, say, how many letters you have to work with will help you understand what the clue wanted from you. Over time, you'll find that you need less and less help to solve puzzles that would have previously been real stumpers. Study UpIf you're serious about crossword mastery, the internet is full of like-minded people who like to help. A blog like Rex Parker's is a great place to start. He solves the New York Times puzzle every day, compares the difficulty to other puzzles of that day of the week, and breaks down important clue/answer pairs in a short post. Between the posts and the comments, you get a more complete picture of the solution than if you had just looked up the answers. You also specialize even further and refresh your crossword puzzle: words that often appear in crossword puzzles, but almost never in a conversation. The New York Times has a quiz that tests your crossword knowledge, and there's a more general guide to Dictionary.com. Perhaps predictably, there is also an entire website dedicated to crossword, with a new word featured every day and an extensive archive. If a statistical approach is more your speed, there are crossword databases out there. Data scientist Noah Veltman analyzed a set of New York Times crosswords and answers from 1996-2012, then ranked them by crossword and how often they appeared. You filter the lists by the minimum number of appearances or word length and view details about a particular answer. Similarly, Xwordinfo.com will show you the most popular answers and clues to Times puzzles per year or word length. Hell, you could really go all-out and code yourself some training programs like this guy did, but it's unclear if his approach is more effective than just doing a whole bunch of crossword puzzles. This is not to say that you should build a robot or remember clues to solve crossword puzzles more efficiently; The best training strategy is the one that makes you happy. It doesn't matter how many puzzles you solve or how quickly you solve them, just that you're holding out. If you do that, you will never stop improving. Mumbai Harbor Crossing Private Sailing PackagePub Crawl MumbaiStreet Food Crawl Do you know the names of the elements from their symbols?. Todd Helmenstine Crossword Puzzles Are Not Only Fun, but Can Be A Good are to practice spelling unknown words, such as the names of the elements on the periodic table. The clues to this printable crossword puzzle are the symbols for the first different elements. An answer key for the crossword puzzle is provided on the next
